## PROFESSIONAL SUMMARY

Founding AI Frontend Engineer with experience building AI-powered SaaS applications using Next.js, React.js, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS. Skilled in developing responsive web applications, integrating REST APIs, and delivering scalable, user-focused solutions. Strong foundation in Data Structures & Algorithms, DBMS, Operating Systems, and Computer Networks, with a passion for building impactful, production-ready software.

## TECHNICAL SKILLS

- **Languages:** C++, JavaScript, TypeScript
- **Frontend:** Next.js, React.js, HTML, Tailwind CSS, Responsive UI
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB, MySQL, Schema Design, CRUD Operations
- **CS Fundamentals:** OOPs, DBMS, Operating System, Computer Networks, SDLC
- **Tools:** Git, GitHub, Postman, VS Code

## EDUCATION

- **Maulana Abul Kalam Azad University of Technology** Nadia, WB  
*Bachelor of Technology - Information Technology; CGPA: 8.12* August 2022 - June 2026\*
- **Guidance Academy** Murshidabad, WB  
*Intermediate; Percentage: 92.8%* April 2020 - May 2022
- **Guidance Academy** Murshidabad, WB  
*Matriculation; Percentage: 74%* January 2018 - March 2020

## EXPERIENCE

- **Napplied AI** Hybrid  
*Founding AI Frontend Engineer* July 2026 - Present
  - **Project Overview:** Contributing to the development of AI-powered web applications by building scalable, responsive, and user-centric frontend solutions using Next.js, React.js, TypeScript, JavaScript, and Tailwind CSS. Collaborating with AI, backend, and product teams to implement AI-powered features, integrate REST APIs, develop reusable UI components, and deliver high-performance, intuitive user experiences. Focused on frontend architecture, performance optimization, code quality, and translating product requirements into production-ready features.

## PROJECTS

- **AutoFormAgent - AI-Powered Form Automation Platform** 
  - Built AI-powered form automation features using Next.js, React.js, and REST APIs to streamline intelligent form creation and end-to-end workflows.
  - Integrated CRM systems, Google Sheets, Microsoft Excel, Airtable, and data enrichment services with privacy-first data routing for secure automation.
  - Collaborated with cross-functional teams to deliver scalable, high-performance solutions, achieving up to 99% faster form automation with zero data leakage.
- **Hybrid DE-PSO Algorithms for IoT (Final Year Project)** 
  - Designed and implemented a hybrid Differential Evolution-Particle Swarm Optimization (DE-PSO) algorithm to optimize complex IoT optimization problems.
  - Combined the global exploration capability of DE with the local exploitation strength of PSO, achieving 18-25% faster convergence and reducing premature convergence by 30%.
  - Evaluated the algorithm on 5+ multidimensional nonlinear optimization scenarios, demonstrating improved stability, accuracy, and optimization performance.
- **HelloWasim - Personal Portfolio** 
  - Developed a responsive personal portfolio using Next.js and Tailwind CSS with a strong focus on performance, accessibility, and user experience.
  - Integrated an AI-powered "Ask AI" assistant using the OpenAI API, enabling 50+ real-time user interactions with sub-second response times.
  - Implemented a secure contact form using Nodemailer for reliable email delivery and deployed the application on Vercel with optimized performance.

## ACHIEVEMENTS

- **HACKAUT - Session 1 (2022):** Secured a Top 10 position among 110+ participants, enhancing competitive coding and analytical reasoning.
- **Competitive Programming:** Solved 150+ algorithmic problems across LeetCode and GeeksforGeeks, improving problem-solving speed and coding efficiency by approximately 30%.
- **Hackathon Finalist:** Reached the finals of a college-level hackathon by collaborating with a team to design and build an innovative software solution under strict time constraints.
